

# My Special Place

## By Harley Seelentag

My special place is my old house that was in Chicago. It is my special place because I always remember having a lot of fun there with my family, everyone being together before my mom and dad got divorced.

My brother and I had lots of fun there, we didn't have to go to school because I was 1 and David, my brother, was 3, so we would play all day long. We also had a lot of toys to play with like stuffed animals, barbies, a sit n' spin, little toy cars, and the little car that you sit in and move along with your feet. We would watch cartoon shows all the time. The two main shows we would watch were Blues Clues and Telly Tubbies.

Another reason this house is my special place is because my mom and dad were always there with us so we didn't have to wake up, eat breakfast, and then go to mom's or dad's house we would just be there with both parents already.

And that is why my old house in Chicago is my special place!
