If You Could Change the Style of Your House, Would You Change It? What Would You Change and Why?

I would change my home even though it is a great house already. If I could change one thing about my house, I would add a patio for my room. I would want one because I like nature and I would love waking up to it every day. I could I would also play up there with my friends. That is what I would change about my house.

If You Could Change the Style of Your House, Would You Change It? What Would You Change and Why?

If I could change the style of the house that I live in, I would change the basement door that is outside. Sometimes water gets in because we forget to close it. I would also want to make another floor because there would be more rooms for my siblings and me. I would change the basement by making the door different and the stairs that go into the basement look more normal. I would also fix the lights. Furthermore, I would change the chicken house I own because the floor is mostly dirt and it does not look that nice on the inside. That is what I would change about my house.

If You Could Change the Style of Your House, Would You Change It? What Would You Change and Why?

This is what I want my house to look like.

I wish my house was at least thirty times bigger. I would do many more things with a giant house like outside activities and parties. I would also have giant nerf wars with friends when they came over. They would be surprised when they came over. I am guessing my house would be the size of a mansion. The problems of having a giant house is that I would easily get confused as to where I was going. Another problem would be how long it would take for the house to be finished.

If You Could Move To Another Area of the World That Has Different Geography, Where Would You Move. Why Would You Move There?

Personally I would move to Canada because there are so many things I could do there like skiing, sledding, hiking, and whitewater rafting.

If I would move to Canada I would need a house and there are some beautiful properties in Canada. Also I love the landscape of Canada I think it looks really nice.

One thing that is bugging me is that I love sports and the main sport in Canada is hockey, but I like soccer. Another reason I would move is because of the food. Their food looks so good and I want to have Canadian food for lunch every day.

These are all the reasons I would move to Canada.

If You Could Change One Thing About the Area Where You Live, What Would You Change and Why?

If I could change something from where I lived, I would change the area because there are some weird people around here. I would like to live in a different area because I want to live in a calm peaceful environment. I would also want to change because I would like to have more room to play around with my brother. I would also like a little pond with fish and little creatures. I think this would be cool.

If You Could Change One Thing About the Area Where You Live, What Would You Change and Why?

If I could change one thing about the area where I live it would be to live in Colorado. I would live in Colorado because it gets really cold there and I could play in the snow, go sledding, and maybe learn to snowboard. In Colorado, I would live in Denver the capital of Colorado. I would live in Colorado instead of New Jersey

because the houses are bigger. I want a bigger house.

If You Could Move To Another Area of the World That Has Different Geography, Where Would You Move. Why Would You Move There?

The ideal place for me to live is Florida. Florida has lots of great parks, sights to see, ets. But the best thing about it is the weather. The weather there is so nice, and I could just get a chair and sit outside all day! The bad part about is that there are lots of tropical disasters.

In Florida the landscape is filled with wildlife and forests. Along the southeastern part is a lot of swamps, but I don't want to live there. I want to live along the east coast. There are lots of hills to play on. They also have really good schools. I would go to all the cool cities and meet new people. It would be great to live in Florida!

Are the Houses in Your Area Designed to Be Compatible with the Environment?

What Are the Specific Features of Houses That Make Them Suited For Your Region of the World?

The houses in my area are not supposed to match the environment. One cool thing about some of the house is that they have been here for a long time. My neighbor Bill's house has been here even before my parents moved into the area. His house is so cool on the inside because it has newspapers that are ordered in stacks from the dates from before I was born. He also has photographs of his grandpa, and photographs of his house wfrom many years ago along with photographs of the barn outside of his house. My house does not have any of this stuff, but my house is cool because when we travel (which is a lot) we bring back lot of memories and items from our vacations.

My Year Round Activities

In the summer it is normally around **95°**. Since it's warm, I go swimming in pools, oceans, and even go to the boardwalk. I also love eating ice cream before it melts under the blazing sun. I also love going to water parks and the feeling when I drink an ice cold drink after I've been running around on a hot day.

Next is fall. I love the cool breezes and jumping in leave piles. Fall is the most beautiful season in my opinion. It looks so pretty with all the different colored leaves. I love riding my bike at the end of fall too. I like to do this because it isn't too hot and most of the leaves are off the trails by the end. Also this is the time when volleyball, soccer, cross country, and lacrosse are played

I love winter. The winter here is cold but normally around **50°**. It does snow, but only a few times. Winter is

Different Lands, Different Lifestyles

also a very beautiful season. I love playing in snow. I can make snow angels, have snowball fights, eat it, go sledding, go skiing, ice skating, and at the very end drink warm, chocolatey, delicious hot cocoa.

The last season is spring! There is soccer, lacrosse, baseball, ect. All the plants bloom and animals come out from hibernation. I love spring (except for the allergies)! Spring is a little chilly in the beginning, but is mostly warm.

That is what I do in the seasons because of their temperatures.
