

## **Khawla Secondary Girls School**

### Students' comments on the result of Young CHATTERS or Big CHEATERS

I was not astonished by the result, because I know the situation we are in. I know that there are lots of disadvantages on spending our time chatting, but really really we cannot help it. Chatting becomes part any teenager daily life. We all chat, so how can I not log in and start a conversation when I know that all my friends are there waiting??!!

Well, reading the result makes me realize the size of the problem my colleagues face. I am not addicted to chatting as I have more priorities in my life. I always advise my friends to focus on the important things in their life like studying; having a good relationship with their family; improve themselves and start building their future. I really wish this well come to an end like many other "phenomenon" in teenagers life

I have answered the questionnaire and I admit that I like chatting and I have a long list. However, I do not let that take a big part of my day. Well, my parents do not allow me to spend a long time on the computer. They are always around checking things and asking us about homework and stuff. Therefore, I believe that they have a major rule in their children attitudes and believes towards everything in life. I am not sure what I was going to be used to if my parents weren't the same.

Wow, I think we are in a serious problem. We really need to do something. After reading the result, I may concenter myself one of the people who really need help. I leave the computer open 24/7 it is on and I am logged in even if I am at school, I just put you know the sign "away" and then be online whenever I am in my room. I thought deeply of things I do and wanted to do in my time as one of the student say in the questionnaire and I found out that I am missing a lot and my school marks could have been better than what they are now. Thank you very much for making me realize this. I will do my best to help myself and my friend to reach our best.
