

Internet safety

Al Amal School for Special Education

Internet Safety Rules:

1. **Post Mindfully:** This is how we represent ourselves online, and the permanence of the information we place on the Web.
2. **Be Socially Conscious:** How we manage our social media profiles is very important.

3. **Don't Go Phishing:** Be aware of email scams and suspicious links.
4. **Talk About Cyberbullying:** Make sure kids have someone safe to open up to if they see or experience online bullying.
5. **Keep Kind in Mind:** Always be kind and friendly online; no exceptions.
6. **Power in Passwords:** Always make sure passwords are unique and special; use specific guidelines when creating them.
7. **Watch In-App Purchases:** Be careful when upgrading a new game or app—it can add up to a lot of additional costs.
8. **Danger Zones:** Avoid unfriendly risky places on the Web. Always talk to a parent or teacher about where to avoid.
9. **Know When to Shut Off:** The Web needn't take up all hours of our free time. Learn when it's healthy to walk away and leave the computer alone.
10. **Watch What You Share:** Be careful about sharing personal information online.
